English Usage

Question 1

Fill in the blank with the most suitable option.

If he refuses to fall _____ my plans, I can probably find someone more co-operative.

A. at in

B. in at

C. within

D. in with

Question 2

Fill in the blank with the most suitable option.

It is possible Marlowe _____ plays for the medieval era poet Shakespeare.

A. might write

B. maybe write

C. might have written

D. may write

Question 3

Mark the option which best expresses the given sentence in Indirect speech.

'Ah me!' exclaimed Peyton, 'What a rash deed you have commit!'

A. None of the mentioned options

B. Peyton said that he had committed a very rash deed.

C. Peyton exclaimed sadly that he had committed a very rash deed.

D. Peyton said that what a rash deed you have commit.

Question 4

The sentences given below form a coherent passage when arranged logically. Choose the option which gives the correct sequence.

1. No individual supposes that America has grown into a kingship and put Elvis Presley on the chair.
2. No individual, not even the most faithful of followers, think that Eric formed the world in few days and ceased on the next.
3. It's not for zero that they call Elvis Presley 'The King' and Eric 'God.'
4. But the power of these actions of renaming depends on the presumption that no one understands them correctly.

A. 2431

B. 3412

C. 4312

D. 1234

Question 5

Fill in the blank with the most suitable option :

This _____ of novels has long stopped appealing to the audience

A. composition

B. genre

C. rate

D. print

Shared passage

Read the passage given below and answer the questions that follow.

Happy families are all alike; every unhappy family is unhappy in its own way.

Everything was in confusion in the Ottos' house. The wife had discovered that the husband was carrying on an intrigue with a French girl, who had been a governess in their family, and she had announced to her husband that she could not go on living in the same house with him. This position of affairs had now lasted three days, and not only the husband and wife themselves, but all the members of their family and household, were painfully conscious of it. Every person in the house felt that there was no sense in their living together, and that the stray people brought together by chance in any inn had more in common with one another than they, the members of the family and household of the Ottos. The wife did not leave her own room, the husband had not been at home for three days. The children ran wild all over the house; the English governess quarreled with the housekeeper, and wrote to a friend asking her to look out for a new situation for her; the man-cook had walked off the day before just at dinner time; the kitchen-maid, and the coachman had given warning.

Three days after the quarrel, Prince Stephan Andrew Otto—Stewie, as he was called in the fashionable world—woke up at his usual hour, that is, at eight o'clock in the morning, not in his wife's bedroom, but on the leather-covered sofa in his study. He turned over his stout, well-cared-for person on the springy sofa, as though he would sink into a long sleep again; he vigorously embraced the pillow on the other side and buried his face in it; but all at once he jumped up, sat up on the sofa, and opened his eyes.

Question 6

The tone of the passage is:

A. Lamenting

B. Critical

C. Analytical

D. Narrative

Question 7

The man-cook had walked off because:

A. he had resigned

B. he had taken a leave

C. he had fallen sick

D. Cannot be determined

Question 8

What does the author mean when he says that every unhappy family is unhappy in its own way?

A. The troubles of unhappy families come in varied combinations.

B. Unhappy families cause different kinds of troubles for each other.

C. If families are unhappy, they face things differently than if they had been happy.

D. All of the mentioned options

Question 9

Choose the word that is opposite in meaning to the word given below.

INQUISITIVE

A. Distracted

B. Bright

C. Witty

D. Obstructed

Question 10

Choose the best replacement for the underlined part of the sentence.

Everyone irrespective of wealth or status have the right for approaching courts for mediation on disputes.

A. have the right for approaching courts

B. has the right to approach courts

C. have the right to approach courts

D. has the right for approaching courts

Analytical Reasoning

Question 11

If in a certain code language, "H" is coded as "8", "CAS" is coded as "3119" then how would "EXCEED" be coded in the same code language?

A. 5253664

B. 5243554

C. 5253445

D. 5244556

Question 12

Read the following argument and mark which of the following assumptions is made in this argument.

Parents should teach their children to cook food from their childhood.

A. It will make them careful about their work.

B. Learning a small thing can enhance their capabilities.

C. Cooking is a life saving skill.

D. None of the mentioned options

Question 13

The question given below is followed by two statements numbered I and II. Determine if the statements are, individually or together, sufficient to answer the question.

Question: What is the value of x in terms of y?

Statements:
I. $zy = 4$
II. $xz = \sqrt{8}$

A. Both statements I and II together are sufficient to answer the question asked but neither statement alone is sufficient.

B. Each statement alone is sufficient to answer the question.

C. Statements I and II together are not sufficient to answer the question asked and additional data to the problem is needed.

D. Only one of the statements, alone, is sufficient to answer the question but other statement is not.

Shared passage

Read the following information carefully and answer the questions that are given below it.

All the roads of a country are either parallel or perpendicular to one another. The roads are all straight. P,

Q, R, S and T are parallel to one another. Tracks A, B, C, D, E, F and G are parallel to one another.

- Road P is 2 km east of road Q.
- Road Q is 1 km west of road R.
- Road S is 2 km west of road T.
- Road A is 1 km south of road B.
- Road C is 2 km north of road D.
- Road E is 1 km north of road F.
- Road E is 2 km south of road G.

Question 14

If E is parallel to C and E is 1 km south of D and 2 km north of A, which two roads be 1 km apart?

A. AG

B. AC

C. DE

D. BD

Question 15

Which of the following possibilities would make two roads coincide?

A. T and Q are 1 km apart.

B. F is 1 km north of C.

C. C is 1 km north of E.

D. S is 1 km east of P.

Question 16

In the following question, the symbols @, !!, *, ? and # are used with the following meanings illustrated.

"M * N" means "M is not greater than N".
"M !! N" means "M is neither greater than nor equal to N".
"M # N" means "M is not smaller than N".
"M @ N" means "M is neither smaller than nor equal to N".
"M ? N" means "M is neither smaller than nor greater than N".

Now assuming the given statements to be true, find which of the given conclusions given below them is/are definitely true and give your answer accordingly.

Statements:
I. J !! T
II. B @ P
III. P !! J

Conclusions:
I. B # J
II. T ? P
III. J !! B

A. Only conclusion I and conclusion III follow

B. Only conclusion I follows

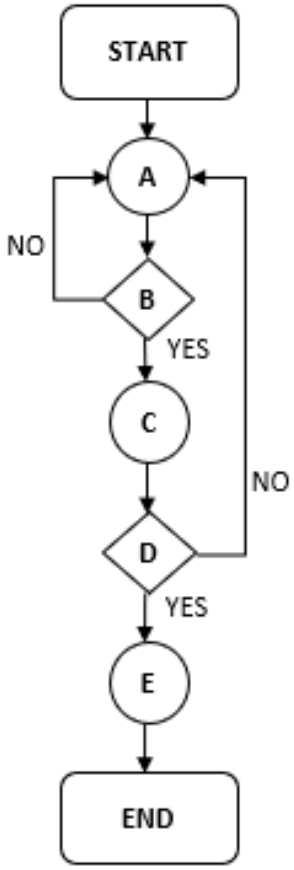

C. Only either conclusion I or conclusion III follow

D. None follow

Shared passage

Study the flowchart given below and answer the questions that follow.

Box No.	1	2	3	4	5	6	7	8	9	10
	3	7	8	15	24	34	48	63	80	99

Add : (Numbers in the box) + (1). Put the result in the same boxes.

Is there any perfect cube stored in any of the boxes?

Subtract: (Numbers in the box) - (Smallest perfect cube stored). Put the result in the same boxes.

Is there any perfect cube stored in any of the boxes?

Cube root: $\sqrt[3]{}$(Numbers in the box). Put the result in the same box.

Question 17

How many WHOLE NUMBERS would be stored in the boxes at the end of the flowchart?

A. 3

B. 1

C. 4

D. 2

Question 18

What number is stored in Box 6 at the end of the flowchart?

A. 3

B. 2

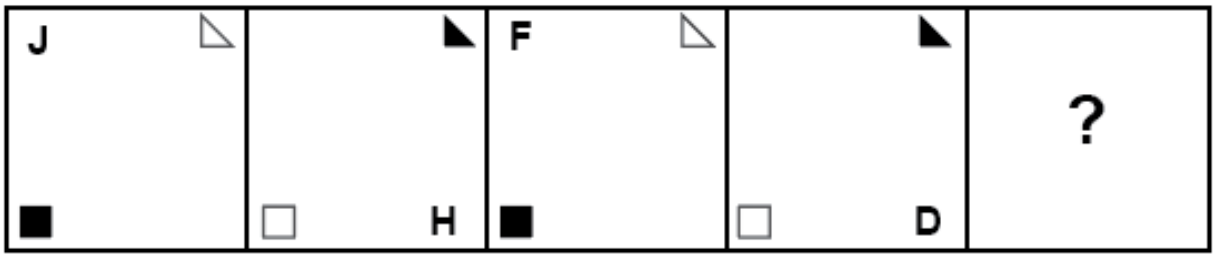

C. 4

D. 1

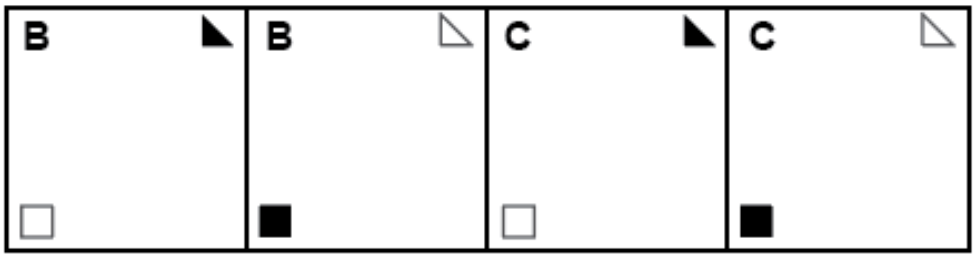

Question 19

From the Response Figure identify which should complete the sequence given in Problem Figure.

Problem Figure:

Response Figure:

A. (3)

B. (4)

C. (2)

D. (1)

Question 20

Find the missing term in the series given below:

4, 21, 107, 538, ?, 13475

A. S

B. 2694

C. 2765

D. 3245

Quantitative Aptitude

Question 21

Find the number of zeroes in the result of:

5 x 15 x 22 x 11 x 44 x 135 x 20 x 42 x 95

A. 2

B. 3

C. 4

D. 5

Question 22

In how many ways can 20 identical red poles and 15 identical yellow poles be arranged in a queue so that no two yellow poles are together?

A. ${}^{21}C_{14}$

B. ${}^{20}C_{14}$

C. ${}^{20}C_{15}$

D. ${}^{21}C_{15}$

Question 23

Determine the area of a circle of diameter 7 cm.

A. 28.5 cm^2

B. 64.5 cm^2

C. 80.2 cm^2

D. 38.5 cm^2

Question 24

A mobile phone lock can be opened using a four-digit number. What are the total possibilities of opening the lock, if it is known that one of the numbers in the combination is 5 and repetition is not allowed?

A. 2016

B. 2723

C. 2833

D. 2756

Question 25

Kristen borrowed 1.2 million dollars at a rate of 12% per annum under a simple interest from a bank and bought two houses. He rented them out at $15,000 per month each. In how many years he can repay the loan with the rent?

A. 5.55 years

B. 8.33 years

C. 7.2 years

D. 3.2 years

Shared passage

Given below is the average immigration data in absolute numbers for a country. Please answer the questions below based on this data.

Average Annual Immigration, 1960-65 through 2000-05	
1960-65	300,000
1965-70	400,000
1970-75	700,000
1975-80	900,000
1980-85	900,000
1985-90	1,300,000
1990-95	1,400,000
1995-00	1,800,000
2000-05	1,500,000
Data : Pew Research Center, 2008. Includes legal and illegal immigration	

Question 26

In which two sets of 5 years the average immigration rate has remained constant?

A. 1960-65, 1965-70

B. 1965-70, 1975-80

C. 1995-00, 2000-05

D. 1980-85, 1975-80

Question 27

Which is the only period of 5 years where the average annual immigration has fallen over the previous period of 5 years?

A. 2000-05

B. 1960-65

C. 1990-95

D. 1995-00

Question 28

A train travelling at 25 kmph leaves from Delhi at 9 am, and another train travelling at 35 kmph starts in the same direction from Delhi at 2 pm. At what distance from Delhi will they meet?

A. 435.2 km

B. 434.1 km

C. 436.3 km

D. 437.5 km

Question 29

The sum of the roots of a quadratic equation is 23 and the product of its roots is 120. Find the sum of the square of its roots.

A. 164

B. 544

C. 369

D. 289

Question 30

An engine can travel with a velocity of 24 kmph. Its speed is diminished by a quantity that varies with the square root of the number of wagons attached to it. It is known that with 9 wagons attached, it can travel at 18 kmph. What is the maximum number of wagons that can be attached to the engine so that it can still move?

A. 143

B. 167

C. 400

D. 124
